

Fort Ebey State Park

Invasive English Ivy with Fruits & Seeds Removed from the Battery & Nearby Trees

Volunteers
removed
two
truckloads of
mature ivy
that was
forming
seeds.
< Ivy "Trees"
& Stems >

When English Ivy matures
the leaves become
rounded and the plant
< produces berries that
have seeds inside.
Birds eat the berries and
can spread seeds
throughout the park.

5" diameter – Ivy stem >

Thanks to our
dedicated
volunteers,
Coupeville
High School
LEOs Club
members and
Park Staff for
removing
the Ivy!

Great Team! Working together to care for our local State Parks!
